

“ My tractor bearing failures stopped when we started using Mystik. Ten years later, we’re still trouble free. ”

Tom Farney
Farney Farms, LLC

“We run thirty-three units on our wheat and fertilizer application operation. And running sixteen-hours a day in the heat and dust puts a lot of stress on equipment. It really puts your lubrication to the test. That’s why we run Mystik® oil and grease in our entire fleet. Breakdowns are not an option in our business.”

Ask the people who know best. When it comes to protecting heavy farm, trucking and industrial equipment, there’s no better name than Mystik. Our innovative technology provides more than superior lubrication, it provides confidence.
