

“ My neighbors ask me why I have so few breakdowns. I tell ‘em Mystik. ”

Larry Robinson
Robinson Farms

“We’re the main alfalfa producer for the horse industry in this area and we don’t baby our equipment. We ran the first tractor I ever bought almost 10,000 hours before we finally overhauled it. No one could believe the condition of the bottom-end of that engine. The bearings were fine. We didn’t even turn the shaft. That’s why we run Mystik® in every irrigation pump and vehicle on our farm. And we always will.”

Ask the people who know best. When it comes to protecting farm, heavy trucks and industrial equipment, there’s no better name than Mystik. Our innovative technology provides more than superior lubrication, it provides confidence.
