

FOODLINER®/QUEST LINER® EXTENDS FLEET SERVICE INTERVALS AFTER SWITCHING TO MYSTIK® JT-6® HEAVY DUTY SYNBLEND 460 #2 GREASE

One of the largest bulk food grade and specialty chemical carriers in the United States – Foodliner/Quest Liner – operates a fleet consisting of over 240 tractors and 400 specialized trailers to transport products across North America. Extending regreasing intervals for their local, regional and long-haul drivers, so that it better aligns with their increased oil drain intervals, is a top business priority.

Always looking to improve customer maintenance goals, Mystik advised Foodliner/Quest Liner to “just try” Mystik JT-6 Heavy Duty SynBlend 460 #2 Grease in a trial. After a couple of months of testing in the city and two extreme temperature ranges – a hot Houston

summer and subzero North Dakota winter, the Mystik grease still applied very easily and stayed in place on the fifth wheel, preventing exposure to road grime and salt and exhibiting no signs of rust or dry spots.

Following the exceptional trial results, Foodliner/Quest Liner made the switch to Mystik JT-6 Heavy Duty SynBlend 460 #2 Grease for their fleets. Foodliner/Quest Liner's local drivers were not coming into the shop as regularly to regrease the fifth wheel and their regional and long-haul drivers did not need to regrease on the road as frequently either. This alignment of timing was ideal with the longer times between oil changes.

FLEET PROFILE:

Foodliner®
Going The Distance

**QUEST
LINER**

A McCoy Group Transportation Company

- Bulk food grade and specialty chemical carrier since 1958
- Headquarters: Dubuque, Iowa
- National Presence: 33 branch locations in 48 states, Canada and Mexico
- Over 1700 tractors and 3100 specialized trailers

"While using Mystik JT-6 Heavy Duty SynBlend 460 #2 Grease, our long-haul drivers did not need to regrease as often, but they still had a convenient squeeze tube to reapply as needed."

Tyler Neumann,
General Manager, Cement Division, Quest Liner

THE "JUST TRY IT" APPROACH TO SALES

The Mystik team worked carefully with Quest Liner's Cement Division, General Manager, Tyler Neumann to safely extend their local, regional and long-haul drivers regreasing intervals to better align with their increased oil drain intervals. The Mystik team was confident in offering the "just try it" test-trial approach. Mystik JT-6 Heavy Duty SynBlend 460 #2 Grease is part of the JT-6 premium line of greases and is a specially formulated, NLGI #2 high-performance grease that surpasses industry and market demands for a wide variety of applications.
