

# Frattalone Reduces Maintenance and Hourly Costs with Mystik® JT-6® Grease and CITGARD® Heavy Duty Engine Oil

Frattalone, a civil site construction company, operates over 300 pieces of heavy equipment that services clients across the Midwest. Improving overall heavy-duty equipment performance and reducing maintenance and hourly costs are top business priorities.

In order to recommend the appropriate lubricants, the CITGO & Mystik team analyzed Frattalone's current grease and oil in our lab for compatibility, performance and to help them with pin and bushing wear in certain applications. With this knowledge, **The CITGO & Mystik team, along with Kath Fuel Oil and Service, suggested switching to Mystik JT-6 Heavy Duty SynBlend 460 #2 Grease and CITGO CITGARD 700 Synthetic Blend Heavy Duty Engine Oil 10W-30. The high-performance grease is designed for a wide variety of heavy-duty applications and the low-viscosity engine oil is specifically formulated to reduce soot, extend oil drain intervals and improve fuel economy.**

By switching to Mystik JT-6 Heavy Duty SynBlend 460 #2 Grease and CITGO CITGARD 700 Synthetic Blend Heavy Duty Engine Oil 10W-30, Frattalone saw a reduction in downtime due to improvements in oxidation and reduced soot, and they saw no change in oil consumption in their fleet.

## The Dependable Approach to Sales

The CITGO & Mystik Lubricants technical experts and Kath Fuel Oil and Service, their local supplier, worked closely with Frattalone's Chief Operating Officer, Tony Frattalone, and Equipment Superintendent, Kory Kunza, to help improve their overall heavy-duty maintenance performance. Doing so prolonged the life of their equipment and reduced their maintenance and hourly costs.

Results may vary based on operating conditions and other factors.

For guaranteed results, speak to your CITGO authorized representative about the CITGO Guaranteed Efficiency Program.

---

*"We vigorously tested the Mystik JT-6 Heavy Duty SynBlend 460 #2 Grease when Kath first brought it to us to ensure it was a right fit. After the testing, we couldn't get enough of it. The grease just outperformed our expectations and the operators just wanted more of it. The grease stayed on longer, which reduced downtime and consumption, and it saved us tens of thousands of dollars per year on time and parts."*

— Tony Frattalone  
Chief Operating Officer,  
Frattalone Companies

## Heavy-Duty Equipment profile:

### Frattalone Companies

- Established in 1970
- Headquarters: St. Paul, Minnesota
- Currently operating 300+ pieces of heavy equipment and more than 60 GPS units
- Specializes in earthwork, demolition, underground utilities and energy services

*"There are areas where we were able to reduce our maintenance costs because of Mystik and CITGARD. In the industry today, by reducing those maintenance costs we were able to reduce our hourly and equipment costs to help us be more competitive. "*

– Kory Kunza  
Equipment Superintendent,  
Frattalone Companies
